MATERIALS:

- 2 pipe cleaners
- About 40 beads -- we used a combination of clear and plain ones
- Headband
- Tacky glue or hot glue gun (Optional)

INSTRUCTIONS:

- Thread beads onto the pipe cleaners -- you don't have to push them together too tightly -- leave about an inch on either end of each pipe cleaner -- this depends on how wide your headband is.
- Wrap one end of the beaded pipe cleaner around the headband and twist to hold (you can put a dab of glue if you like).
- Push the beads for the first arch of beads close together, leaving just a smidge of room.
- Loop the pipe cleaner around the headband again. -- again apply hot glue if desired.
- Continue until you have three arches.
- Wrap the end of the second pipe cleaner around the first pipe cleaner (push the beads aside so you can get it right around the pipe cleaner -- that's why we left the smidge of room in the previous step.
- Repeat this two more times, making the arches the size you prefer.
- Snip off any excess pipe cleaner.
