

# WITH YOU

## KIDS RECIPE : EMOJI COOKIES

### Ingredients

- Oreos
- Yellow Candy Melts
- Candy Eyes
- Candy Teeth
- Black Decorating Gel
- Wax Paper

### Directions

- Line your counter with a piece of wax paper for easy clean up
- In a plastic or glass bowl melt your candy melts according to package instructions.
- I usually do about 15 seconds in my microwave, stir, 15 seconds, etc. until it is melted completely. Store the extra candy melts in a ziploc bag.
- Drop your Oreo cookie into the melted candy. Spoon some candy melt on top.
- Once coated, place on your wax paper. Using a fork might make it easier for you to transfer your cookie onto the wax paper.
- Using the candies, add your eyes and/or mouth if your emoji of choice has them.
- Allow the candy melt coating to harden – it begins forming pretty fast.
- Draw any other facial expressions using your decorating gel.  
(Tip: Use decorating gel. The edible pens don't work well on the candy coating.)
- Allow the gel to set and you're ready to serve! Get creative and make all sorts of faces!
